

# Autofulfillment<sup>®</sup> Paper Mailer System

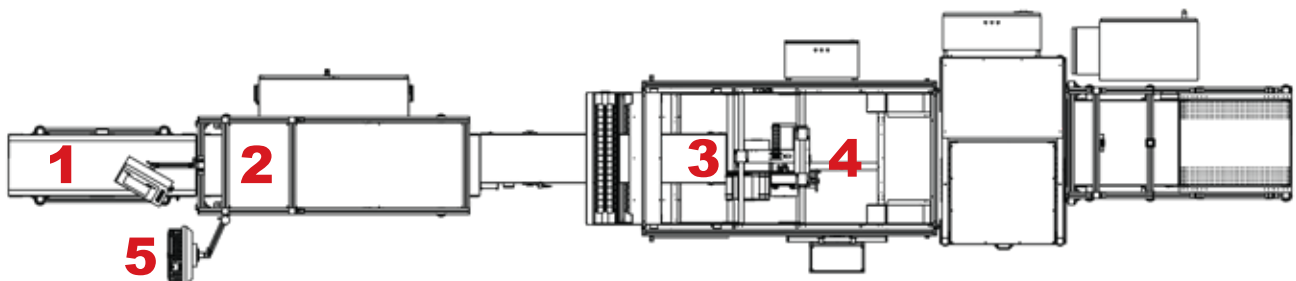

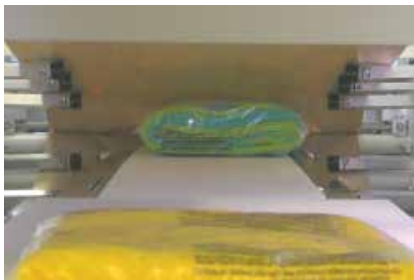

Accutech is pleased to announce the latest in our range of e-commerce fulfillment systems:  
**The Autofulfillment Paper Mailer System.**

In addition to having all of the features of our fully automated Apparel Autobagger that our customers currently enjoy, this new system will utilize the Beck-Packautomaten Serienpacker Paperbag vs, which was developed in direct response to current market demands for environmentally-friendly paper packaging.

The paper mailers made by this system are  
**CURBSIDE RECYCLABLE**  
to meet today's sustainability goals.

- 1) Product is placed on the infeed
- 2) Product or order barcode is scanned
- 3) Dimensions are scanned and package is wrapped and sealed to form mailer
- 4) Shipping label is printed and applied to top layer of paper
- 5) Extensive reporting throughout the process.

**Please contact us if you would like to learn more about this revolutionary new system.**
