FOR IMMEDIATE RELEASE

MIKE KENEALLY ELECTED TO AIM (Associated Industries of Massachusetts) BOARD OF DIRECTORS

It is with great pride that Accutech Packaging announces that Mike Keneally has been appointed to the Board of Directors of Associated Industries of Massachusetts. Mike believes strongly in AIM's mission. He has been personally active in supporting them, both individually and through Accutech, for some time.

AIM is governed by a board of directors made up of distinguished business leaders representing every industry and every region of the Commonwealth.

From AIM's website:

Associated Industries of Massachusetts (AIM) is the statewide association for Massachusetts employers.

AIM is the only association with the size, influence, respect and professional talent to give you the power to shape the future of your business. Thousands of member employers look to AIM for integrity, professionalism and results. They have done so for almost a century.

Our mission:

- Support legislation and regulation that promotes business growth and jobs.
- Provide world-class management and human resource services that keep employers competitive.
- Create opportunities for employers to meet new customers, find new markets and generate revenue.
- Educate workers and managers for the new economy.
- Assist employers with access to workers compensation coverage and services as well as employee benefit programs.

AIM member companies range from multinational biosciences companies and high-tech manufacturers to professional services firms and the corner grocery store. Our members employ one out of every five workers in Massachusetts.

We invite you to join them!

For more information about AIM: www.aimnet.org or call 800-470-6277

About Accutech: Accutech Packaging produces custom plastic thermoformed packaging, paper mailers and envelopes, and paperboard specialties. We also offer in-house tooling, design and product fulfillment. In addition, Accutech manufactures mail order packaging equipment to automate the outbound shipping process.
