## DESCRIPTION

BUBBLE WRAP® Brand Flex is an on-demand inflatable cushioning system with the ability to produce air cushioning materials ranging from ultralight for source reduction to heavy duty for damage protection. The Flex produces inflatable packaging materials at speeds up to 90 linear feet per minute.

## KEY BENEFITS

### Features

### Product Integrity

### Operational Efficiency

### Package Optimization

- Accessories available to customize the system to your needs.
  - Faster inflation makes lines more productive, employees more efficient, and gets more products out the door on time.
  - Produces up to 90 feet of inflatable cushioning per minute.
- 
- Patented technology maximizes inflation and reduces excess materials up to 50%.
  - Inflation in each cell reduces the material needed for superior damage protection.
- 
- Produces cushioning materials at speeds up to 90 linear feet per minute.
  - Faster inflation of packing material makes lines more productive, employees more efficient and gets more products out the door on time.
  - The system has a compact footprint (less than 6 square feet) that works well in cellular packaging environments.
  - Limits the potential for throughput loss, as components are manufactured with high-performance materials and coatings to ensure long-term system reliability.
- 
- Flexible for all packaging operations, the system includes multiple accessories for various packaging configurations.
