

***The first truly sustainable cooler!***

Produced using all-natural materials, SustainTemp provides all the attributes necessary to support the claim of being Planet-Preferred.

The SustainTemp Shipper can be easily disassembled, making it Curbside Recyclable and Compostable. Our components came from the earth and can be returned to the earth!

***Of course, while Sustainability is important, so is Performance!***

SustainTemp is not only Planet Preferred but testing also shows our shipper exceeds required temperature parameters better than other supposed earth friendly products.

It is also equal to or better than EPS depending on the application. The secret is the unique patent-pending inner box design along with the Variable Depth Insert. Both features in combination minimize air loss and movement of product in the box. This means greater protection for valuable cargo - your product!

Available in the 3 stock sizes primarily used in shipping pharmaceuticals. Using ISTA 7E Summer and Winter profiles, SustainTemp can meet 2-8°C, 15-25°C and -20°C parameters for 36+ hours.

**STANDARD SIZES:**

Item #	Inside Dimensions	Payload Size
ST86	8 x 6 x 9	7 x 5 x 4
ST1210	12 x 10 x 10	10 x 8 x 6
ST1212	12 x 12 x 12	10 x 10 x 8
