

Sustainability Statement

Committed to protecting our people and our planet.

Accutech Packaging, Inc., is committed to the adoption and promotion of sustainability practices across all our business operations. We are firmly dedicated to conducting our operations in a socially responsible manner. We are committed to best practices and strive to become a leader in our field of sustainable manufacturing by fulfilling financial, regulatory, environmental and social obligations.

Our sustainability practices provide a framework for management, employees and contractors to conduct operations and deliver services in an environmentally friendly and responsible manner. They also outline our objectives and recognize that our sustainability efforts are one of continuous improvement. We rely on the commitment and energy of our employees to help us achieve our sustainability goals. Accutech Packaging, Inc. nurtures employees' engagement in sustainability programs, motivates employees to connect with sustainability practices and encourages new concepts to influence future sustainability policies.

In all business activities, Accutech Packaging, Inc. gives consideration to the environment and its natural resources. We design and develop products, services and production processes with careful concern for the environment. We aim to provide the best product to our customer whilst keeping our carbon footprint to a minimum through the following:

- Utilizing renewable energy sources
- Waste recycling
- Using recycled and reusable packaging
- Adopting energy efficient processes
- Procurement of sustainable raw materials

Sustainability Initiatives

Committed to protecting our people and our planet.

Renewable Energy Sources

- Geothermal Watering and Cooling Systems
- Solar Power - 65% of our electric consumption is through a solar buyback program

Facilities

- LED Lighting through our facilities
- Accutech uses non-toxic food-grade cleaners, oils and coolants.
- Accutech provides washable fabric uniforms to our employees which eliminates the disposal of over 100 plastic aprons per week.

Waste

For over 30 years, Accutech has been environmentally responsible by recycling plastic materials, preventing them from accumulating in landfills.

As part of our sustainable solution, Accutech manufactures packaging with RPET, which is 100% recycled plastic and certified food safe by the FDA. Recycled PET requires 79% less energy to produce than virgin PET. This reduction of greenhouse gas emissions greatly contributes to reducing the carbon footprint.

Packaging is coded with recycle numbers to again encourage our end users to recycle through municipal systems such as curbside pickup and container deposit collections.

Accutech recycles the following:

- | | |
|---------------------------------------|-----------------------------|
| • PET, PVC and Styrene | • Ink and Toner Cartridges |
| • Corrugated | • Glycol |
| • Paper | • Pallets |
| • Aluminum, Steel and Stainless Steel | • Plastic and Glass Bottles |
| • Batteries | • Cans |
| • Electronics | • Blades and Steel Rule |

Products

Accutech takes every opportunity to design and develop our products with careful concern for the environment.

We also specialize in designing and building Automated Sustainable Packaging Machinery

- Autofulfillment Paper Mailer System produces packages that are curbside recyclable.
- Accutech Apparel Autobagger can produce packages utilizing 100% cPCR film.
